

INDIANA FAMILY PUPPIES

CONGRATULATES YOU ON THE ADOPTION OF YOUR NEW PUPPY!
You will be given an application for registration. We encourage you to register your new family Member!

Your puppy has had his/her first & second round of shots. It has been administered a vaccination and deworming protocol that is Above Industry Standards. To give your puppy the best protection, please continue with its vaccinations at 12 weeks, 18 weeks, and 6 months old. Then continue with an adult booster every year. Please discuss all vaccinations with your veterinarian. Do not Attempt this on your own!

We Guarantee your puppy to be free from --hereditary diseases that would prevent your puppies long and happy life—up and until the puppies first birthday. To the best of our knowledge, your puppy is being adopted in good health. If you take your puppy to the vet with-in 2 business days from date of purchase and your vet finds a serious hereditary problem, you may return your puppy (with-in 4 Business days from the date of purchase only) and we will either refund your money for the purchase price of the puppy (excluding shipping) or allow you to pick out another puppy of equal value. Written and dated explanation from the vet is required, with the vet's phone number. We reserve the right to have the puppy checked by our own vet in some instances prior to issuing a refund or exchange.

Infectious diseases, such as parvo, kennel cough, and others are not covered by our guarantee as we have no control over what a puppy is exposed to after he/she leaves our home.

Puppies are not guaranteed against injuries. They are not guaranteed against undecided testicles. We can give an estimate of adult size but cannot guarantee it. All veterinary costs incurred once the puppy is in the buyer's possession are the sole responsibility of the buyer. **NO Exceptions!!**

THANK YOU! Please let us know how your puppy is doing and feel free to call us if you have any questions or concerns. We do appreciate emailed photos!!
